25l automatic

- diameter 250 mm
- total height 540 mm + handle
- capacity: approx. 8 kg of hulled sunflower seeds
- color: white and grey

Bird feeders help birds survive Finland's harsh winter, when finding food becomes difficult. Around 70 bird species spend the winter in Finland, and by feeding them, you not only support their survival but also bring more life and joy to your yard.

Leomuovi bird feeders are handcrafted at our factory in Akaa, Finland, using recycled Finnish plastic. The feeders are available in most discount stores as well as hardware and grocery stores.
