

THE BEST INSTALLATION SHIMS ON THE MARKET

The Most Reliable Choice for Construction

According to professionals, these installation shims are considered the best on the market! They are suitable for various applications, including the installation of light partition walls, wall elements, and hollow-core slabs, as well as window and door installations!

**DURABLE,
YET LIGHTWEIGHT**

**100 % RECYCLED
MATERIAL**

**SAFE AND
PRACTICAL**

OUR INSTALLATION SHIMS ARE:

PROVEN DURABILITY

Light shims withstand 5,000 kg, while heavy shims withstand 12,000 kg

100 % RECYCLED MATERIAL

PP (polypropylene) and PC (polycarbonate) make the shims exceptionally lightweight

WEATHER-RESISTANT

Does not mold, rot, or provide a breeding ground for microbes. Shims are packed in moisture-resistant plastic bags

SAFER

Alignment pins prevent tipping and make installation easier. Non-slip when wet, will not rust like steel, and will not weaken from moisture like plywood
